

NPB-450-NFC

450W General Type
Smart · Safe · Reliable Charger

Universal

Wide Voltage Compatible, One Machine for Multiple Purposes

Suitable for lead-acid or lithium batteries, wide voltage range allows one machine to be compatible with different voltages.

-30~70°C Optimal Temp. Range

Industrial grade ultra-wide temperature design, suitable for global application, operates reliably even in narrow, heat-prone environments.

Intelligent

NFC Sensing Easy Setup

- Voltage and current can be adjusted with 2-stage or 3-stage charging according to usage requirements.
- Auto-stop charging time can be configured.
- Exclusive patented intelligent voltage detection mode can be switched.

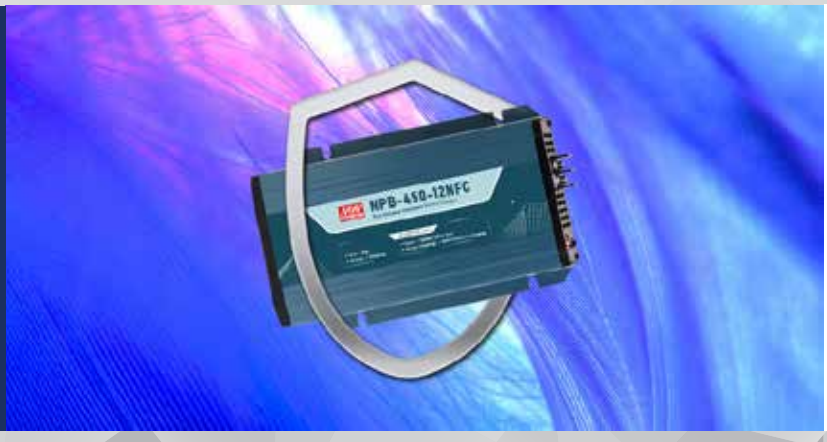

International Certification, Safety Assurance

Third-party safety certified, and built-in multiple intelligent protections Ensure security.

Safe

Reliable

3-year Warranty Reliable And Durable

Industrial-grade quality, meticulously selected materials, 3-year long lasting warranty, exceptionally durable.
