VFD

Variable Frequency Drive Module

VFD-200C-230 VFD-350C-230 VFD-750C-230	VFD-250P-230 VFD-350P-230	VFD-150P-48 VFD-250P-48 VFD-350P-48
Enclosed Type	5"x 3"	4"x 2"
		
Universal AC Input with PFC Suitable for 3φ 200V~240V Motor	**Universal AC Input with PFC** Suitable for 3φ 200V~240V Motor	**SELV DC Input** Suitable for 3φ 48V Motor

Fanless Design **0** *noise*

High Efficiency up to ***93%***

200% *Providing* ***200%*** *peak current*

MEAN WELL has launched a new product line : the "VFD" series which are industrial brushless DC motor variable frequency drive module. This series includes multiple models, power ranging from 150W to 750W, covering both DC and AC input voltages, as well as two types of form factor including PCB board and semi-potted chassis types for selection. The AC input models has built-in PFC function with universal AC input voltage range. All models are equipped with standard hardware control and sensor signals interfaces enabling external control with PWM signal for various motor and speed control applications.
